Write for prices on anything not listed.

My Nursery is inspected yearly by the Vermont State Inspector and holds his certificate that it is free from all insects and diseases.

MAR 16 1916

San Jose Scale has never been known in this section.

Special Offer in Apple Trees

12 trees 1 to 2 foot my selection as to varieties, by mail postpaid for \$1.00.

Special Offer in Strawberry Plants

200 plants 2 varieties, my selection of varieties by mail, \$1.00.

12 perennial flowering plants, my selection of varieties by mail, \$1.00.

Vermont is one of the best states in the Union for the planting of Commercial Fruit Orchards. Our fruit is far better quality, will keep better, and properly graded and packed, will bring better prices than the fruit grown in the famed fruit sections of the far west.

There is no reason why we cannot make the Apples of White River Valley as well known in the World's markets as are those of Hood River or the Bitterroot. Sour Cherries are another fruit peculiarly adapted to our conditions and we could command the markets with our late varieties; this remark also applies to Strawberries. The markets of southern New England would gladly prolong their berry season with our fruit of which they would take thousands of crates.

My prices are cash with order, all goods at purchasers risk and purchaser to pay express charges except where especially stated to the contrary.

Address all communications to

ARTHUR DINGS

The White River Nursery

R. R. 1 SOUTH ROYALTON, VT.

WHY PLANT MY TREES ?

- 1st They are true to name, I personally graft my own trees and set them in the nursery row, so I can know my trees are not mixed by careless help.
- 2nd My scions are cut from selected bearing trees; no scions are taken from trees that are not heavy bearers of large, fine, well colored fruit of the variety.
- 3rd My trees are grafted on whole roots on American grown seedlings.
- 4th My trees are grown in our cold New England climate which insures ironclad hardiness.
- 5th Living here in Northern New England, I know the value of your section of the different varieties of fruit, I can advise intelligently as to selections either for home use or the commercial orchard.

I can give expert advice on all orchard problems. I have had a life-long experience in commercial orcharding and will contract to lay out, plant and supervise the growing orchards, large or small.

I make a specialty of Orchard Pruning, the Renovation of Old Orchards and Commercial Spraying.

I guarantee my work to be right and my prices are reasonable.

I can furnish Vegetable Plants in season, also Pansy, Aster and Geranium Plants for spring planting.
